# h2b safer on Instagram

Instagram is a mobile based photo-sharing app which allows users to share pictures and videos either publicly or privately. Just like other social networks, you can interact with other users on Instagram by following them, commenting on their posts, liking their posts, tagging and private messaging. Keep in mind that when your profile is created and set to public, anyone can find and view your profile, along with all your photos and videos.

Stay safe on Instagram using the instructions on privacy, blocking & reporting below;

Privacy

Set your account to private using these simple instructions;

- On your profile, tap on the **safety settings** wheel.
- Scroll down to **Account Privacy.**
- Swipe the tab on so it appears blue.
- Your Instagram is now private.

Block

Block a user using these simple instructions;

- On the users profile, tap the **three dot icon.**
- Tap **Block.**
- Tap **Block** again to be extra sure the contact has been blocked.

Report

Report a user using these simple instructions;

- Locate the image you wish to report.
- Tap on the **three dot icon.**
- Tap **Report Inappropriate.**
- Then select why you are reporting.
